Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A " " following a place name indicates that the place is coterminous with the MCD. A " " indicates that the place is also a false MCD; the false MCD may or may not be shown.
- 2 This map shows tribal census tract boundaries and numbers within the subject county. Nontribal census tract boundaries are shown outside of the subject county. Tribal census tracts are defined by the tribal census tract type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian reservation or off-reservation trust land. Tribal census tracts or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary. Therefore, if a tribal census tract crosses a single state or county boundary, the tribal census tract number will be repeated on both sides of the boundary.
- 3 A " " following a block number indicates that the block number is repeated elsewhere in the block.
